

POLITIKA ZAŠTITE OKOLIŠA

U Enikon Aerospace-u prepoznajemo vlastitu odgovornost za smanjenje negativnih učinaka naših aktivnosti na okoliš. Kako bi osigurali predanost principima sprečavanja onečišćenja i neprestanog poboljšavanja, razvili smo i implementirali sustav upravljanja okolišem prema standardu ISO 14001.

Sve naše aktivnosti moraju se odvijati sukladno važećim nacionalnim propisima vezanim uz zaštitu okoliša, kao i propisima zemalja u kojima Enikon Aerospace djeluje.

Implementirali smo ekološke trendove u naše poslovne strategije. Investiranjem u nove tehnologije težimo poboljšati vlastitu energetska učinkovitost, optimizirati upotrebu resursa i poboljšati sustav upravljanja otpadom u skladu s našim ciljevima.

Čovjeka smatramo sastavnim dijelom okoliša, te težimo postići potpuni nadzor nad učinkom aktivnosti organizacije na zdravlje i sigurnost svakog radnika.

Ova je politika implementirana u pogon Zagreb. Management pogona ima osnovne odgovornosti za razvoj ekološke osviještenosti među radnicima. Svi radnici pogona Zagreb moraju biti svjesni ove politike i odgovornosti koje iz nje proizlaze, naših značajnih aspekata, vlastitog doprinosa učinkovitosti sustava upravljanja zaštitom okoliša.

Politika zaštite okoliša u Enikon Aerospace-u djeluje u promicanju razumjevanja rizika u zaštiti okoliša te korištenju principa predviđanja mogućih zagađenja okoliša te sprječavanju zagađenja prije samog nastanka.

ENVIRONMENTAL POLICY

In Enikon Aerospace, we recognize our responsibility to reduce the negative effects caused by our activities to the environment. In order to ensure our commitment to the principles of continual improvement and prevention of pollution, we have developed and implemented an environmental management system in accordance with the ISO 14001 standard.

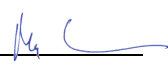

All our activities must be conducted in conformity with the valid national legal requirements relating to environmental aspects, as well as with legal requirements of the countries in which the company performs its activities.

We have implemented ecological trends into our business strategies. By investing in innovative technologies, we seek to improve our energy efficiency, optimise use of resources and improve our waste management system in accordance with our objectives.

We consider the human being to be an integral part of the environment and we aspire to accomplishing complete supervision over the effect of our activities to health and safety of every employee.

This policy is implemented in facility Zagreb. Facility Management is primarily responsible for creation of environmental awareness among all employees. Every staff member of Enikon Aerospace must be aware of this policy and its implied responsibilities, our significant environmental aspects, their contribution to the effectiveness of environmental management system.

Enikon Aerospace's environmental policy works to promote an understanding of environmental risks and to use the principles of anticipating possible environmental pollution and preventing pollution before it occurs.
